

Coastal Phenomena:

- Protect your home against the possible intrusion of sea water.
- Do not stand at the end of piers or jetties; do not risk taking photos near where there are breaking waves.
- Avoid fishing in risk areas.
- Do not drive near the beach front.
- Never swim alone or on remote beaches or anywhere you are uncertain of the water currents.
- Avoid bathing on beaches with a red flag or in areas where there are strong waves and surf or lack of surveillance and rescue services.
- Avoid water sports when an alert for coastal phenomena has been issued.
- If you notice some larger than normal waves, do not stay near the shore.
- If you have a boat, try to berth it in a sheltered place.
- If you see other people in dangerous areas, warn them of the danger.
- If you fall into water, stay away from where the waves break, shout for help and wait to be rescued.
- If you see that someone has fallen into water and is in trouble, throw a rope, or something buoyant that can be clung to. Notify immediately 1-1-2.
- For any request for information, call 012.
