

## **Strong winds:**

### Preventative actions:

- Close doors and windows to prevent air currents that could lead to breakages.
- Remove from balconies and roofs the pots and all objects that could fall onto the street.
- Check the houses exterior for any cornices, balconies and facades in poor conditions that may cause falling rubble and debris.
- Avoid going out hiking or camping until normal weather returns.
- Try to postpone travel by road or proceed slowly and with caution. The use of public transport is recommended.
- Do not use motorcycles and high-sided vehicles (trucks, vans caravans) that are at risk from strong cross winds.

### Recommended advice:

- Avoid walking through gardens and woodlands where trees and branches may fall.
- Stay away from walls, old houses, scaffolding, light signs, billboards and other structures that could be knocked over by the wind.
- Electrical towers are dangerous. Move away and in case of risk alert on 1-1-2.
- In case of risk from unstable construction cranes immediately notify authorities on 1-1-2.
- Try to stay away from the coast (beaches, boardwalks, breakwaters, etc.), to avoid being dragged into the water by large waves.
- Drive slowly and with caution. Look out for fallen obstacles, especially on overtaking and or going around bends.
- Be careful not to call by phone in order to avoid the lines to collapse.
- In case of emergency, please feel free to call 1-1-2.
- For any request for information call 012.
